BEYOND
regulatory compliance in the age of AI.

BEYOND is the first hybrid AI solution designed for regulatory teams in Medtech & Pharma, combining top-tier AI workflow automation with 20+ years of compliance expertise.

Powered by ZenAI

A modular AI platform enabling task-specific automation for regulatory compliance.

ZenAI integrates multiple LLMs and domain-specific use cases to streamline:

- Document analysis and generation
- Data extraction
- Audit readiness

This foundation powers BEYOND's regulatory applications, ensuring speed, precision and regulatory compliance (MDR/IVDR, FDA, national regulations).

Examples of Available Use Cases

- Risk-Management & Usability
- Audit-Readiness & CAPA
- Regulatory Path Assessment
- IVDR QMS & MDR QMS
- SaMD Lifecycle &AI/ML Governance
- MD Cybersecurity

and many more ...

Key Capabilities Beyond Chatbots

- **User-Friendly Interface:** Centralized, modern UI to manage and create AI agents without coding.
- **Data Connection:** Integrates and processes large datasets from various sources beyond traditional RAG .
- **System Integration:** Real-time, secure access to existing IT systems via customizable connectors.
- **Full Data Control:** Deployed on your own IT environment to ensure maximum control over data flow.
- **Secure Access:** Role-based access and SSO authentication for AI agents, APIs, and data.
- **Flexible Models & Providers:** Choose preferred AI models, providers, and set security classifications.
- **Seamless Integration:** Easily embed AI logic into any application via REST API.
